

Maya Stelzer

Lafayette, CA | 925-948-5994 | maya@bipper.net | github.com/MayaStelzer

Experience

Implementation Consultant Intern – FAST Enterprises

Salem, OR · Jun 2025 – Aug 2025

- Developed custom C# and SQL solutions for enterprise unemployment insurance and paid leave systems, improving client-specific functionality by collaborating with analysts
- Conducted thorough QA testing, ensuring new functionality met client requirements and reduced post deployment issues
- Translated business requirements into technical solutions, in a fast-paced, client facing environment

Teaching Assistant for Data Structures & Algorithms – Gonzaga University

Spokane, WA · Aug 2024 – Present

- Graded assignments and exams with detailed feedback, supporting 50+ students' learning outcomes
- Facilitated office hours and helped students debug code, improve comprehension of complex topics like recursion, trees, and hash tables
- Maintained clear and consistent communication between students and faculty

Education

Gonzaga University – Spokane, WA

B.S. Computer Science, Minor in Applied Mathematics

GPA: 3.9 | **Expected:** May 2026

Relevant Coursework: Machine Learning, Data Science Algorithms, Web Development, Software Development, Operating Systems, Database Systems, Compiler Design, Applied Cryptography, Data Structures and Algorithms, Mobile App Development, UI/UX, DevOps

Technical Skills

Languages: Python, Java, SQL, C++, C#, HTML/CSS, JavaScript, Kotlin

Tools & Frameworks: Git, GitHub, Docker, Linux

Projects

ChoiceConnect Fixed Network — Log Anomaly Detection System

Python, PyTorch, Docker · Current

- Designed and implemented an unsupervised machine learning model detect anomalies in large-scale Linux log archives, improving detection of unusual patterns
- Developed a self-training feedback loop to improve model accuracy over time and adapt dynamically to new software releases and log patterns
- Collaborated with a small team, Itron sponsors, and advisors to align technical development with stakeholder goals

NBA Salary Visualizer

React, D3.js, SportsDataIO API, JavaScript · Jul 2025

- Build a dynamic web tool to visualize NBA team payrolls and cap thresholds
- Integrated real-time player salary data via the SportsDataIO API; implemented a custom trade simulator to model cap impact scenarios
- Developed interactive visualizations with D3.js to highlight team financial structures and rule-based cap compliance

Binary Space Partitioning Algorithm Analysis

C++, Python · Nov 2024 – Dec 2024

- Implemented both naive and optimized BSP algorithms; conducted runtime benchmarks on large input sets
- Authored a technical report detailing performance results and trade-offs

Personal Portfolio Website

React, HTML/CSS · Dec 2024

- Build and deployed a mobile-responsive personal website showcasing project and professional experience
- Hosted via GitHub Pages: mayastelzer.github.io/New-Personal-Website
